

Accessing the AIM Modules through HealthStream

Thank you for your interest in accessing this valuable content through HealthStream. There are a number of easy options to access the modules.

HealthStream customers who use the HealthStream Learning Center or hStream

- The AIM modules are available individually as a part of our free content library on the HLC. Search the catalog for “AIM” and the 8 modules will appear at the top of your search. They can be assigned by an admin or self-assigned.

HealthStream customers who use a different LMS

- For HealthStream customers who do not use our LMS and access content via AICC files, you can find the instructions on accessing these files in the HealthStream Learning and Performance community here: [Learning & Performance - HealthStream](#)

Not a HealthStream customer?

Access the AIM modules online at Nursegrid Learn or HealthStream CME Courses.

- <https://learn.nursegrid.com/pages/aim-patient-safety-bundles>
- <https://cmecourses.healthstream.com/pages/aim-patient-safety-bundles>
- These courses are available to the public and provide CNE and CME at no charge.

Improve maternal health: free patient safety courses

The Alliance for Innovation in Maternal Health (AIM) has created the Patient Safety Bundles, developed by experts, to provide evidence-based guidance on preventing severe complications during pregnancy and postpartum.
